

## ■ CopyColour

- Printing ink for manually colouring **CopyPhot** (photosensitive anodised aluminium) sheets.
- Available in 10 base colours and 13 mixed colours.
- The colours can be mixed together.
- The colours can be made less intensive by using **CopyThinner**.
- The inks may also be used for photosensitive aluminium sheets other than **CopyPhot**.
- Shake well before use.
- Shelf life: 2 years, when stored in a dark place.

## ■ Copythinner

Thinner for diluting the intensity of the **CopyColours**.  
Shelf life: 2 years, when closed properly.

## ■ CopyClean

Solvent for cleaning the printed and sealed sheets.  
Shelf life: 2 years, when closed properly.

## ■ CopyStrip Liquid

Liquid for stripping the hardened exposed photo emulsion from the sheet.  
Shelf life: unlimited.

## ■ CopyStrip Liquid Concentrated

Concentrated **CopyStrip**, which has to be diluted with cold/tepid tap water.  
Mixing ratio: 1:4.  
Shelf life: unlimited.

## ■ CopyPhot Retouching Lacquer

Correcting emulsion for covering, before colouring the sheet, small pin-holes in the exposed and hardened emulsion.  
Shelf life: 1 year.

## ■ CopyLon Photo-emulsion

Photo emulsion for coating (**CopyPhot** and **DuraSeal**) anodised aluminium sheets photosensitive (again). A Foduktor (roller coater) or a Coating Bar can be used for this purpose. CopyLon consists of 2 components: the emulsion and diazonium salt ( **Sensitizer** )  
Shelf life of prepared **CopyLon**: 2 weeks in a dark cupboard, 3 weeks in the refrigerator.  
Shelf life: 1 year.

## ■ Copleon Sensitizer

Diazonium salt to make the photo emulsion photosensitive.  
Storage: in a dark place.  
Shelf life: 1 year, when stored in a dark place.

## ■ Sealing Salt

Liquid that serves as a buffer for the seal water pH value.  
Mixture: 3 gr / litre of seal water.  
Shelf life: 1 year.
