

DuraPor anodised aluminium plates

DuraPor plates are anodised aluminium plates with open pores and a decorative surface structure. This base plate can be printed both digitally as by silkscreen printing. Moreover, this plate is also suitable for most aluminium printers of other brands. These plates do not have a protective coating, but they have a guaranteed shelf life of at least 3 months thanks to special purpose packaging.

Aluminium

- AlMg 1 ½ hard, (5005)

Anodised layer

- DuraPor25 : 23 - 25 micron
- DuraPor20 : 19 - 21 micron
- DuraPor15 : 13 - 15 micron

Base colour

- Silver

Shelf life

- 3 months under the following circumstances:
- Relative humidity: 50 - 55%
- Temperature: 18 - 25°C
